18962562186 | 2832445617@qq.com | 23009200100@stu.xidian.edu.cn | <https://github.com/WestNorth-Wolf>

Education

Xidian University | Computer Science and Technology | Computer Software and Theory | Junior

GPA: 4.0/4.0, Core GPA: 94.53/100, Rank: 1/122(Major Track), CET4: 599, CET6: 573.

National Scholarship for 2024 and 2025 consecutive academic years; BYD Scholarship in 2025.

Technical Skills

- **Programming Languages:** Familiar with C/C++(CMake), Python. Understanding of Java, Matlab.
- **Workflow:** Linux, VSCode, JetBrains IDE, keil MDK, Git, GitHub.
- **Embedded Systems:** Familiar with embedded development, mainly using STM32F4 series microcontrollers based on FreeRTOS operating system.
- **Others:** Understand basic project management knowledge and common tools, developed and practiced simple project management frameworks.

Competition Awards

2025 National Undergraduate Electronics Design Contest <i>National Second Prize</i>	2025.08
The 24th China University Robot Competition · RMUC 2025 <i>Third Prize</i>	2025.08
The 23rd China University Robot Competition · RMUC 2024 <i>Second Prize</i>	2024.08
The 17th National College Student Mathematics Competition · Shaanxi <i>First Prize</i>	2025.12
Xidian University 2024 National Undergraduate Innovation Training Program Project <i>Qualified</i>	2025.07

Project Experience

IRobot Team Member | Embedded Team Member, Project Management 2023.09—Present

- Embedded Hardware: Able to design simple circuit boards, responsible for the hardware circuit part of the robot.
- Embedded Software: Programming with embedded C/C++, developing STM32F4 series microcontrollers, implementing robot control and communication with host computer.
- Software: Research competition-specific communication protocols, write multi-machine communication code, assist in developing sentinel decision-making, radar system, and custom client software.
- Hero Team Leader&Operator: Track and manage the robot's R&D progress, responsible for organizing debugging and testing, and take responsibility for the robot's performance on the field.
- Project Management: Based on OKR method, with the help of Feishu platform, build project management framework, conduct project management to ensure the project progresses as planned.

2025 National Undergraduate Electronics Design Contest | *Embedded, Team Leader* 2025.08

- Embedded Development: Responsible for the software and hardware development of the embedded system in Problem C (Target Measurement Device Based on Monocular Vision).
- Comprehensive Evaluation: Responsible for the main circuit design, soldering and debugging work in the comprehensive evaluation session of the electronic design competition.
- Team Leader: Responsible for the project management, task allocation and team cooperation of the whole team, participate in the research and debugging of vision algorithms.

Personal Statement

- I have excellent academic performance, outstanding self-learning ability, exploration spirit, strong adaptability and self-motivation, with excellent communication and teamwork skills.
- I actively participate in various competitions and engineering projects, have accumulated rich practical experience, and have the ability to independently solve complex problems.
- In the process of developing embedded projects, I have improved my ability to discover and solve problems, and can write efficient and reliable code.
- Believe in the power of original intention and love, maintain enthusiasm for technology, willing to continue learning and growing, exploring the future of technology and the possibilities of the world.
